

Superheroes... great at saving the world... not so great at expanding brackets...

Help them out by pointing out their mistakes!

Expand and simplify

$$(3x - 4)(2x - 5)$$

$$6x^2 - 23x - 20$$

$$6x^2 + 20$$

$$5x^2 - 21x - 9$$

$$29x + 20$$

$$x^2 - 23x + 20$$

HULK SMASH!
